

JOSÉ DIEGO MORENO PULIDO

ABOUT ME

Self-taught web developer, started coding in 2023. I began with Python and Reflex, a framework that allows you to use React components with pure Python, and then I went over what I already knew about HTML5, CSS3, and JS. I've completed several projects on my own that have helped me improve my skills.

WEB DEVELOPER

EXPERIENCE

SUPPORT TECHNICIAN AND SALES ASSISTANT

PCBox

2018

I completed my internship at PCBox, where after taking a course in microcomputer system repair, I learned and assisted in repairing customers' devices. I also worked as a sales assistant in the store.

WEB DEVELOPMENT AND DESIGN

PANORAMAWEB

2020

After completing a course in web design and development, I started an internship at PANORAMAWEB, where I assisted in developing client websites using WordPress, managed an online store with WooCommerce, and performed tasks as a Community Manager. Upon completion, I received a letter of recommendation from the company's CEO.
